

# Verde Seaming Tape

Fabric /Polyethylene Film Laminate

## INTRODUCTION

Verde Seaming Tape is a specially constructed tape for use with the recommended adhesive in forming strong bonds when seam jointing artificial grass carpets used in landscaping of busy leisure areas.

The tape consists of a strong geo textile white fabric on one side and this is laminated to a polyolefinic film to prevent the penetration of adhesive through to the under surface. The Verde Seaming Tape is recommended use with shorter pile carpets where it is important to minimize the height of the tape and for all landscae applications.

## FEATURES

- Used for short pile carpet seam joints
- Ideal for landscape and leisure applications
- Impervious to moisture ingress from the base
- Strong rot proof geo-textile bonding medium
- Lays flat to substrate when rolled out
- Sealed back to prevent adhesive penetrating to base
- Minimum thickness to prevent show through at seams

## METHOD OF USE

**IMPORTANT:** Before embarking on any work involving Verde Sports Seaming Tape, the Safety Data Sheet should be carefully read by those carrying out the work.

## APPLICATION

Verde Seaming Tape is designed for use with polyurethane adhesives. It is constructed to form strong bonds, particularly to shorter pile artificial grass carpets .when used with these adhesives. The correct amount of Verde adhesive is applied by a notched applicator, in a central band of approximately 25cm, to the fabric side of the tape. The edges of the carpet are then pressed into the wet adhesive.

For more detailed information instructions on the use of this product see the Data Sheet for the relevant adhesive.
